

Your bridge between Dreams and Reality

Full stack developer & Full graphic designer [VIEW SERVICES](#)

Scroll down to see how I do it! ▾

I can create:

Optimized Data Secure authentication Seamless integrations Detailed analytics
User interfaces to control it all Beautiful websites to show it all

It always starts with the data...

Creating a functional and intuitive website entirely depends on modeling good quality data upfront. I can model simplistic yet highly effective data structures, not only to create fast websites now, but to provide a solid foundation for additions in the future.

Let's fill in a data structure to create some new products together!

```
"shopItems": [  
    {"name": "-----",  
     "price": "-----",  
     "description": "-----",  
     "minimumQuantity": "-----",  
     "maximumQuantity": "-----",  
     "categories": [  
         {"+": "-----"}  
     ],  
     "imageUrls": [  
         {"+": "-----"}  
     ],  
     "sales": [  
         {"+": "-----"}  
     ]  
}
```

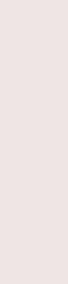

```
-----
```

In order to have users, you need secure authentication...

Authentication on the web has given us many of the things we tend to take for granted: ecommerce, cloud storage, social media. I can give you the peace of mind by securely implementing many different methods of authentication, whether it be through an OAuth2 provider like Google, or entirely from scratch.

Let's create you a user from scratch together!

Integrations give more power to your applications...

Integrations have been instrumental in translating collected user data into real-world action items. This is responsible for many aspects of the web, such as online payments, automated emails, analytics, cloud storage, CMS tools, or any resource management software. I can assess and integrate any software that your technology stack needs, whether it uses an SDK, an API, or an RPC.

Let's use an integration with Spotify together to find you some new music!

The more detailed the analytics, the more detailed the strategy...

Data collect is an invaluable resource for growing, adapting, and focusing your business operations.

Here's some examples of your activity on this page!
